

Digital RAMS

DataScope's RAMS Management System has been specifically designed to streamline the Risk Assessment and Method Statement approval process allowing contractors and the supply chain to electronically upload RAMS for digital approval from one, user-friendly online system.

We configure the system to follow your site specific approval process, with **automatic email alerts, a secure electronic audit trail of all approvals, rejections and revisions.** It can be fully integrated with DataScope's suite of systems. It directly integrates with our dynamic planning tools, DataTouch and Collaborative Planning to link work activities to RAMS for each contractor.

Features

- Upload and submit RAMS securely on the DataScope System and any accompanying documents
- Attach images for visual assessment
- Customise the category of documents which can be added to a submission
- Multi-Stage sign off of RAMS where required
- Automatic RAMS expiry alerts
- Revise RAMS and include revision numbers
- Set validity durations
- Colour-coded status for approved, pending, rejected and closed out RAMS

DataScope's RAMS Management System is modular but can be **fully integrated with DataScope's suite of systems.** It directly integrates with our dynamic planning tools, DataTouch and Collaborative Planning to link work activities to RAMS for each
