

DataVision

DataVision is a digital signage tool that lets sites display a range of media as well as live site data and dashboards on TV screens.

The screens pull live data into a range of dashboards and reports displaying key information in real time. DataVision can be controlled and updated remotely, as required, with the option to schedule different layouts and/or messages to be displayed at certain times.

System Features

- **Branded** to your organisation
- **Flexible** screen layout
- **Multi-messaging** – can play unlimited messages and graphics at the same time
- **Plays all media types** – images, video, live TV, scrolling texts and more
- **Easy to use** – update message areas in seconds
- **Multi-user admin** – authorised staff members can control their own zone of the screen if required (password protected)
- **Scheduling** – show certain messages

Media Options

DataVision has a flexible media and layout options with multiple widget options which can be moved, altered or changed at any time.

DataWall

DataWall's multiple screens creates single seamless display, bringing together project data in a customisable format controlled through a few clicks on your mobile, tablet or laptop. The solution is supplied with a switching app that allows the user to instantly switch between templates using their smartphone, tablet or laptop allowing for greater flexibility. Our flexible interface means that individual displays and widgets can be customised or altered at any time using our purpose-built software.
