

# Digital Permits

Digitising the end-to-end permit approval process

Specifically designed to digitise and streamline the permit approval process, DataScope's Permits App enables site teams and subcontractors to electronically complete, manage and approve permits via any smartphone device.

DataScope will work with you to design and build a permits system that both digitises and automates your end-to-end permits approval process saving time, increasing productivity and eliminating paperwork.

Integrated with our Time & Attendance System live permits can be linked directly with the operatives carrying out the work. Permits can be viewed and approved/rejected both via the app and the web system by authorised users.

**Multiple data capture options**

**Electronic signature**

**Multi stage approval**

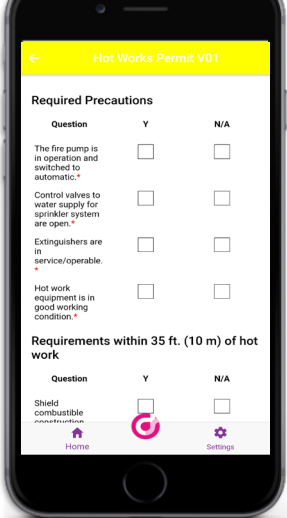

**Time & Attendance system Intergration**

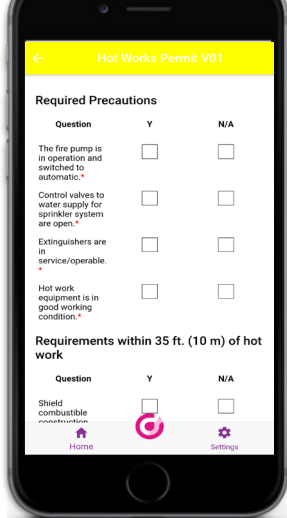

**Automatic email alerts**

**Auto generated PDF permit forms**

Multiple permit types can be added and selected from the App including Hot Works, Assets, Room Access, Electrical Safety and more.

## Fully Customisable Forms and Processes

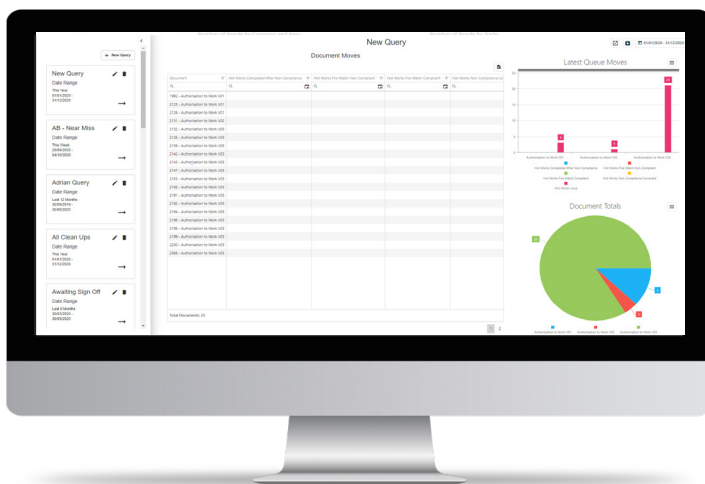

Underpinning the app, DataScope has built intuitive supporting software which allows us to create custom forms and document processes as well as digitising existing manual forms, workflows, and approval processes to meet our customers' exact requirements.

## Automated Digital Audit Trail

For each permit, all actions taken, approvals/rejections, and completed forms, signatures and photographs are instantly available to view in one automatically created PDF.

Document	Reason	Date Moved	Moved By	Moved From	Moved To
(997)	Submitted from mobile app	01-10-2020 09:00	Joe Roggs (Clear ID 1111)	Electrical Work Permit - Live	Electrical Work Permit - Close
(997)	Submitted from mobile app	27-04-2020 08:11	John Smith (Clear ID 0000)	Electrical Work Permit Pending PCC approval	Electrical Work Permit - Live

## Dashboard Reports

DataScope has a mature reports engine with a large range of standard prebuilt reports available which could be customised to suit individual reporting requirements. In addition to this we have report building software, automated reporting and data export options and API data connections are also available.
